# Terms and Conditions

- PAYMENT IN FULL REQUIRED TO EXPEDITE ORDER
- **WE ARE SORRY BUT WE CANNOT ACCEPT CREDIT CARDS**
- 15% CRATING CHARGE ON ALL PURCHASES
- F.O.B. Cleveland

If a shipment is made via UPS and the charges are not prepaid, it will be shipped C.O.D.

Claims for merchandise damaged will not be accepted after fifteen (15) working days of the ship date from our company.

A 25% restocking fee will be charged on all items approved for return.

Pick-Ups Only: If your order is not picked up within 5 working days after you are notified, a \$5.00 per day storage fee will be charged.

CANADA Orders: Must add \$5.00 USD more per order.

Cartouche Orders: Most cartouches are manufactured and shipped in several pieces.

## **NOTICE:**

Normal orders take three to four weeks to process.

**Prices for cornices, friezes, mouldings, beams and crestings are intended per foot.**

We do NOT process orders for less than twenty (20) feet per product number.

When ordering materials, please give the article number. If a letter appears with the article number, be sure to include the letter also.

If an item is not listed on this price list, it has been discontinued.

Please include a daytime telephone number, where you can be reached, with your order.

Your cooperation in this respect will greatly help to facilitate the handling of your order.

*Prices are subject to change without notice*

*If item not found in price sheet, it is no longer available*

***Return Policy: Items cannot be returned after 30 days of invoice or over ordering.***

*Light sanding or filling of small pinholes may be required on some pieces.*

## **EXTERIOR COMPOSITION ORNAMENTS**

The plaster we use for our composition ornaments is actually calcium sulfate or gypsum. Dextrine is added to this powder to give both hardness and strength. Solidly embedded in these ornaments is plaster fiber which is derived from the manila plant. It is much stronger than the sisal, and therefore more advantageous in our work. Also embedded in the larger ornaments are rods and channel iron painted white. There can be no guessing about the ratio of water and plaster, as the hardening and settling would not be proper, and the ornament would crumble before it could be taken from its glue mold.

Before an exterior ornament leaves our shipping room, it is sprayed with boiled linseed oil as a weather-proofing. However, before installation it should receive at least two thin coats of oil based paint on all sides. All joints and screw heads should be sealed with a waterproof compound, and the upper edges gun-caulked with an elastic compound so there is no possibility of water seepage behind the ornament. Where exposed to the weather, the cap must be flashed with 16 oz. copper or equal material.

If an exterior ornament is allowed to become wet before painted, the paint will peel and the whole thing will deteriorate.

Emphasis should be placed on the fact that all sides should be coated before installed. In the instance of a cartouche or doorhead, the back sides as well as the front.

**Many of our products are available in polyester resin for a 20 percent upcharge.**

**Please call us for more details.**

---

# INSTALLATION INSTRUCTIONS

## EXTERIOR

Our products are made from two types of plaster which are reinforced with fiberglass and hemp. Before item leaves our plant, they are sprayed with a boiled linseed as a weatherproofer, however, before installation, please paint with at least two (2) coats of oil base paint on all interior, exterior surfaces. All joints and screw heads should be sealed with a waterproof compound and the upper edges, gun caulked with an elastic silicon compound so there is **no possibility** of water seepage behind the ornament.

If exterior ornament is allowed to become wet before painting, the paint will peel, it will resist additional coats of paint and will deteriorate. It is extremely important that all surfaces should be coated before installation and the rustproof countersunk screws used. Water cannot lay on product.

## INTERIOR

Installed the same as wood products. Liquid nail and rustproof countersunk screws.

## CORNICES, FRIEZES, MOULDINGS, CENTER PIECES, Etc.

1. Our products are installed like using a wood product.
2. Drill holes so they can be screwed into studs in wall, countersink screw (rustproofed). First apply some adhesive to back like liquid nail. Put in position and screw into wall, add some plaster or spackle to edge. Press next piece firmly into it so some plaster is pushed out after it is installed. Tool the edges next day. Sand lightly so you cannot tell where the piece starts or stops. Corners are mitered with a miter box.. Just saw with a regular saw.
3. Caulk top and bottom with an acrylic compound and smooth edges with a wet paintbrush.
4. Paint.

*Center pieces are installed basically the same way, try to find studs in ceiling.*

## NICHE

1. Cut hole in wall to accommodate niche.
2. Wood supports need to exist either behind or around the niche. If they do not, install 2x4 supports in the hole.
3. Drill holes into the niche and countersink screws through the niche into the wood supports.
4. Patch with plaster over the screwheads and when plaster is dry, lightly sand.
5. Caulk or plaster around outside edge of niche where it meets the hole opening.
6. Finish as desired.
